

PREMIUM ALFRESCO FRIDGE

Model No. BFR1088-101, BFR2088-101

BFR1088-101:
1 door, 97 L capacity

Width: 500mm

Depth: 555mm (Including handle)

Height: 835mm

BFR2088-101:
2 door, 187 L capacity

Width: 900mm

Depth: 555mm (Including handle)

Height: 835mm

IMPORTANT: RETAIN THESE INSTRUCTIONS FOR FUTURE USE.

For the most up-to-date version of this manual, please visit the product page at gasmate.com.au, as updates and improvements may be made periodically.

PRODUCT DESCRIPTION

Inspect contents of the box to ensure all parts are included and undamaged

- 1. Triple glazed heated glass door(s)
- 2. Adjustable digital thermostat control inside fridge
- 3. Adjustable shelves
- 4. Light switch
- 5. Lock(s)

INSTALLATION & OPERATION

Electrical Installation

The electrical system of this refrigerator must be supplied through an earthed (3 pin) circuit with a residual current device (RCD) having a rated residual operating current not exceeding 30 mA. If uncertain have a qualified electrician check your electrical system before installation and/or use. All electrical connections are to be made in a dry area. Outdoor power points must be weatherproof and installed by a qualified electrician.

Safety

Before attempting to operate this refrigerator, the following basic safety precautions should be taken to reduce the risk of fire, electric shock and personal injury. It is important to read the instruction manual and to understand it's applications, limitations and potential hazards associated with this refrigerator. This refrigerator is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning the use of the appliance by a person responsible for their safety. This refrigerator is not designed for use within 1m or above a water source. It is important that you read, understand and follow these instructions very carefully. They are designed for the safety of yourself and others ensuring a long and trouble free service life from your refrigerator. This electric refrigerator complies with Australian and International standards and safety requirements. Repairs should only be carried out by qualified persons using original spare parts. Failure to do so may result in considerable danger to the operator.

SAFE OPERATION

Beware of Children and Pets

Children should not be allowed to touch or operate refrigerators or touch cords. All refrigerators should be kept out of reach of children, preferably locked when not in use.

Do Not Abuse the Power Cord

Never yank or pull on the power cord to disconnect it from the mains supply socket. Never carry or move your refrigerator by its power cord. Keep the power cord away from heat, oil, solvents and sharp edges. Check power cord regularly for signs of damage. If the power cord becomes damaged have it replaced by an authorised service facility. The power cord should be regularly examined for signs of damage and the appliance is not to be used if the cord is damaged.

Extension Cords and Reels

This refrigerator is NOT designed to run off an extension cord. If you require an additional power point please have one installed by a qualified electrician.

The use of extension cords may cause power voltage loss which will result in damage to the compressor this will NOT be covered under warranty.

FOR YOUR SAFETY

NOTE: If using the refrigerator outside in an alfresco area ensure that it is directly connected to an outdoors power point.

Ensure this refrigerator is not left in the weather or in direct sunlight as this may affect cooling performance.

The electrical system of this refrigerator must be supplied through a residual current device (RCD) having a rated residual operating current not exceeding 30 mA. If uncertain have a qualified electrician check your electrical system before installation and/or use.

All electrical connections are to be made in a dry area.

Outdoor power points must be weatherproof and installed by a qualified electrician.

Sitro Group Australia Pty Ltd is not responsible for incorrectly located refrigerators.

INSTALLATION OF DOOR HANDLES

This fridge is supplied with the door handles detached. Follow the steps below to install the handle(s):

Step 1:

Open the glass door and carefully separate the door seal at the top.

Step 2:

Place the gasket (2) onto the screw (1), then insert them through the handle hole in the door frame.

Step 3:

Attach the handle (3) onto the screw.

Step 4:

Using a No. 3 Phillips screw driver, tighten the screw from the back until the handle is secure.

Step 5:

Refit the door seal at the top, ensuring it is properly seated.

WARNING

- **DO NOT** lift or move the fridge using the door handles, as this may cause the glass to break.
- **ALWAYS** keep doors closed when lifting or moving fridge.

SPECIFIC SAFETY INSTRUCTIONS

WARNING

DO NOT use the refrigerator in areas where there is a risk of explosion or fire from flammable gases. Ensure that the area is kept clear of combustible materials. Do not use the refrigerator in damp areas, without suitable ventilation. This refrigerator is not designed for use within 1m or above a water source. Do not place within one metre (1m) of any water source.

Fire risk exists if this refrigerator is covered by or positioned close to curtains or other combustible materials.

- This refrigerator must be operated on an earthed circuit (3 pins).
- This refrigerator is intended for domestic/household use only.
- **DO NOT** use this refrigerator in either the bathroom or ensuite.
- **DO NOT** use a 3rd party timer, or programmable system with this refrigerator.
- **DO NOT** clean the refrigerator while the refrigerator is on or plugged into the mains power supply.
- **DO NOT** expose the refrigerator to direct sunlight as this may affect the cooling performance.
- If left in direct sunlight the fridge may not operate as designed.
- **NEVER** use with the power cord coiled, bundled up or tied up. Always extend fully before use.
- **NEVER** use the refrigerator if any part of it is damaged.
- Ensure that the refrigerator is disconnected from the mains supply when installing, cleaning or removing/installing.
- Always turn the refrigerator OFF at the unit switch and then the power point switch when not in use for extended periods of time.
- Always ensure that the power cord is fully extended.
- Always ensure that the refrigerator is kept clean and free from dust.
- **NEVER** use refrigerator with cracked/broken glass – replace glass before use.

RISK OF FIRE

- Refrigerant used in this refrigerator is flammable.
- This refrigerator should be installed as per AS5149:2016 to ensure that there are no sources of ignition in any area refrigerant could gather in the event of a leak.
- Following all installation details and guidelines in this manual will meet AS5149:2016 requirements.
- Electrical equipment should not be placed under or near the underside of this refrigerator or anywhere where refrigerant could gather in the event of a leak.
- Only use this refrigerator on flat and level ground.
- **NEVER** allow children to operate, play with or crawl inside the appliance.
- Adults and children should never sit or stand on the fridge as injury may occur.
- When you dispose of your old refrigerators and freezers, remove any doors. Children can suffocate if they get trapped inside.
- This appliance contains insulation formed with flammable blowing gases. Avoid safety hazards by carefully disposing of this appliance. Blowing agent – Cyclopentane
- The appliance must be plugged into its own dedicated 220–240V, 50Hz AC electrical outlet.
- Ensure that the electric outlet is properly earthed to ground. Consult a qualified electrician if you are unsure.
- **DO NOT** use an extension cord or adaptor plug.
- Unplug the appliance before cleaning.
- **NEVER** unplug the appliance by pulling on the power cord. Always grip the plug firmly, and pull straight out of the receptacle to prevent damaging the power cord.

SPECIFIC SAFETY INSTRUCTIONS

WARNING

- Position the appliance in a dry place, avoiding areas of high moisture or humidity.
- **DO NOT** put the appliance in direct sunlight as this may affect cooling performance.
- **DO NOT** put the appliance near stoves, fires or heaters.
- The appliance shall not be exposed to rain as this may affect the finish.
- Keep ventilation openings, in the appliance enclosure or in the built-in structure, clear of obstruction. Do not use mechanical devices or other means to accelerate the defrosting process.
- **DO NOT** use electrical appliance inside the food storage compartments of the appliance.

Protection from Moisture

Avoiding placing the refrigerator in a place where heavy moisture is present so as to minimise possibility of rusting of metal parts. The refrigerator should be kept out of water or direct sprayed water, failure to do this could cause poor performance and/or an electrical short could occur.

Protection from Heat

The refrigerator should be protected from excessive heat sources and out of direct sunlight as this may affect the cooling performance.

Protect from Cold

The bar fridge should be protected from excessive cold weather and frosts. Suggested minimum ambient temperature should ideally be higher than 5°C, so that optimal performance is not affected.

If ambient temperature is likely to drop below 5°C and the bar fridge is not built in cover the top and side of the bar fridge with a blanket, leave the rear and front uncovered.

Moving

When fixed or moved, the refrigerator cannot be set horizontally or reclined to more than 45° or positioned upside down.

Never move while refrigerator is plugged in and operating.

Once you have moved the refrigerator, leave standing in a level position for 4 - 6 hours so that the compressor oil can settle.

Positioning

Ensure the sides and top have at least 10mm clearance and the rear at least 50mm clearance to ensure adequate ventilation and to allow ease of positioning. Never cover the bottom front grill as this is required for ventilation.

After installation the appliance should be left for 4 - 6 hours before it is plugged in and switched on this is to allow the compressor oil to settle.

Disposal of Packaging

Always recycle and dispose of all packaging materials in an environmentally friendly way. For specific information on recycling in your area contact your local Council Recycling Centre.

Disposal of Old Appliances

The majority of components are recyclable, however there are also dangerous chemicals inside. To dispose of old fridges first remove the doors and contact your local council for recycling options.

IMPORTANT

ELECTRICAL DATA

This refrigerator is fitted with a sealed electrical connection plug that is compatible with the refrigerator, the mains supply for Australia and meets the requirements of international standards. This refrigerator must be connected to a supply voltage that is equal to that stated on the rating label. If the mains connection plug or power cord becomes damaged it must be replaced with a complete assembly that is identical to the original, and this must be replaced by an authorised service centre. The supply cord should be regularly examined for signs of damage and the appliance is not to be used if the cord is damaged. Always follow the Australian requirements for connection to the mains supply. If in doubt always consult a qualified electrician.

Note: Before using your fridge, unpack and correctly position. Once in position leave to stand for around 24 hours before plugging in and turning on for the first time.

MAINTENANCE

- The refrigerator should be cleaned and maintained once a month with a soft clean cloth.
- When performing maintenance, make absolutely sure that the power plug is first disconnected from the power outlet.
- Wipe the inner and outer surface of the refrigerator and its accessories with soft clean wet cloth. If they are too dirty, scrub them with neutral detergent, and then clean them with water and dry them with a clean cloth.
- Never use hot water, petrol, alcohol, kerosene, abrasive powder, alkaline detergent, acid, oven cleaners, etc. These could damage the lacquer finish and plastics.
- If the plastic parts in refrigerator become contaminated by oil (animal or vegetable), they could become brittle and possibly cracked.
- Servicing of this refrigerator can only be performed by a qualified and licensed refrigeration technician (hydrofluorocarbon refrigerants) R600a.

CAUTION

- **NEVER** lick icy drinks when they first come out of the fridge. This can freeze burn your lips and mouth.
- **NEVER** allow children to operate, play with or crawl inside the appliance.
- Before you throw away your old refrigerator, take off the door, leave the shelves in place, so that children may not easily climb inside.

IMPORTANT

TROUBLE SHOOTING

1. When the refrigerator does not work:

Check if there is a power failure.

Check if the power plug is plugged into the power outlet.

Check if the power point being used is turned on.

Check that the R.C.D. has not been tripped.

If ambient temperature is above 40°C the Thermal Safety Cut may have operated depending on the installation. Check if unit has restarted once ambient temperature is below 35°C.

2. When the refrigerator is cooling excessively:

The temperature control dial may be set too high.

If you place drinks containing a lot of water directly under the cool air outlets they may freeze. This does not indicate a malfunction.

3. When the refrigerator is not cooling sufficiently:

The drinks may be packed too tightly together which will block the flow of cool air.

You may have put something hot or a lot of drinks into the refrigerator at the same time give the refrigerator 4 – 6 hours to cool warm drinks down.

The door may not have closed properly.

There may be insufficient clearance between the refrigerator and the other surfaces, both sides, back and above.

The temperature control may not be set low enough. Daily ambient temperature may be excessively high. Check there is no direct sun on front of fridge.

4. When condensation forms on the outside of the refrigerator:

Condensation may form on the outside when the humidity is high. This is the same result as the condensation formed when chilled water is poured into a glass. It does not indicate a malfunction. Wipe dry with a cloth.

5. When you hear a sound like water flowing:

A sound like water flowing is the refrigerant flowing. It does not indicate a malfunction.

6. When the cabinets side panel heats up:

The side panel of the cabinet will heat up when the door is opened and closed frequently, when starting the unit and when the unit operates in summer with high ambient outside temperature.

Do not touch the side panel, it is a result of heat from inside the cabinet.

It does not indicate a malfunction.

STABILISING FEET

These are already fitted to your bar fridge. Before turning your bar fridge on please ensure your bar fridge is level front to back and side to side.

1. If your bar fridge is not level use the fitted stabilising feet to level.
2. To level unscrew the low corner stabilising bolt out until bar fridge is level.

Stabilising Foot

WIRE SHELVES

Remove shelves from packaging and locate on the shelf supports and ensure they are level before use.

USING YOUR REFRIGERATOR

DIGITAL CONTROL

The digital display will show the internal cabinet temperature.

Note: This may fluctuate as the refrigerator cycles on/off, this is not a fault.

When the refrigerator is in cooling mode the light under the cooling symbol will illuminate.

When the refrigerator cycles off the light will not be illuminated.

Operating

1. To turn on press the ON/OFF button.
2. To turn off press and hold the ON/OFF button for 6 seconds the display will disappear.

Note: If the unit is unplugged, turned off or power is lost you must wait 3 to 5 minutes before restarting the unit. If you attempt to restart without waiting the refrigerator will not start and may damage the compressor.

Note: If the unit is turned off and not unplugged the internal fans will continue to run, circulating the air so that it does not become stale and dries out any moisture ensuring that no mould appears. If leaving your fridge off for extended periods of time, it is highly recommended to turn the power point off as well. When turning the fridge and power point off it is recommended to leave the glass door/s slightly open/ajar to allow air circulation.

Setting Temperature

Factory set temperature is 4° C.

1. Use the UP/DOWN buttons to select the desired temperature, in 1°C increments.
2. The desired temperature will flash while being changed and will become solid after 3 seconds of no change.

Temperature Scale

To change the highlighted temperature scale press both the UP/DOWN buttons at the same time for 2 seconds. The selected scale will glow.

Internal Light

To turn light on press the LIGHT button.

To turn light off press the LIGHT button.

It is recommended that the light switch be turned on only when required.

BAR FRIDGE PRODUCT RANGE - WARRANTY STATEMENT

SITRO GROUP AUSTRALIA (S.G.A.) WARRANTS THE PURCHASER OF THIS PRODUCT AGAINST DEFECTS IN WORKMANSHIP AND MATERIALS FOR THE FOLLOWING PERIODS FROM THE DATE OF PURCHASE:

For domestic use, this table applies:

Premium Bar Fridge Body Stainless Steel	1 Year (surface rust excluded)
Compressor	5 Years
All Other Items	2 Years

For commercial use: 3 Months

This warranty is not transferable to a subsequent purchaser if the product is sold by the original purchaser during the warranty period.

If a warranty fault appears within the warranty period, S.G.A. reserves the right to replace or repair the product.

In the event that S.G.A. chooses to replace the product, this original warranty will expire at the original date.

If the product includes various accessories or components, only the defective accessory or component will be replaced or repaired.

S.G.A. reserves the right to replace defective parts of the product with parts and components of similar quality, grade and composition where an identical part or component is not available.

Products presented for repair may be replaced by refurbished products of the same type rather than being repaired. Refurbished parts may be used to repair the products.

To make a warranty claim, first contact S.G.A's Customer Service Line on the contact number below.

The purchase receipt for this product is to be retained and must be presented if making claim under the terms of this S.G.A. warranty.

Warranty repairs are free of charge, provided the product is delivered to our Service Department at 33-35 Lionel Road, Mt Waverley, Victoria, 3149 or to one of our Authorised Service Agents.

If a warranty fault is found the freight cost will be credited to the owner. If no fault is found the product will be returned and any costs associated with the service will be charged to the owner.

Products sent freight forward will not be accepted. In most cases the defective accessory or component only will need to be returned. The product or part of the product being returned must be adequately protected in a box.

S.G.A. will not be responsible for any in-transit loss or damage.

This warranty does not apply to any defect, deterioration, loss, injury or damage occasioned by or as a result of misuse or abuse, negligent handling or storage, normal wear and tear or if the product has not been installed and used in accordance with S.G.A.'s instructions, recommendations and specifications or if the product has been subjected to abnormal conditions. The warranty does not apply to blockages caused by insects or living organisms.

The warranty is void if there is evidence of the product being tampered with by unauthorised persons.

The warranty does not extend to installation or disconnection costs.

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure. The benefits of this warranty are in addition to any rights and remedies imposed by Australian State and Federal legislation that cannot be excluded.
